

PRESS RELEASE

3rd Degree – Nana’s Journey

TX: Tuesday 24 May at 9.30PM

Earlier this year 3rd Degree broadcast the story of 37-year-old Nana Ntobela from rural KZN. For years she was bedridden, unable to even stand because of the size of her left leg – it measured one and a half metres in circumference!

Over and over she tried to get help from government hospitals but was turned away. She was told there was no cure for her condition – elephantiasis.

Then 3rd Degree stepped in. We contacted Netcare and they said Nana’s condition can be treated – and even agreed to bring her to Joburg. And so started Nana’s long and difficult journey to recovery.

The big question on everybody’s mind: Will she ever walk again?
